ORDERING GUIDE · BELGIAN BLOCKS & COBBLESTONES

How many cobblestones do I need?

Measure, pick the stone and joint, multiply, add extra. Four steps to the right order.

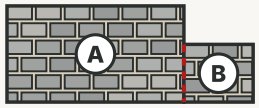

A 800 ft² + B 144 ft² = 944 ft²

At a glance

Formula	**Area (ft²) × stones per ft²**
Rate	**144 ÷ ((length + joint) × (width + joint)), in inches**
Joint	**Wider joint, fewer stones**
Extra	**10% simple · 12–15% curves and patterns**
Borders	**Count by the linear foot**
Check	**Run it through the calculator**

1 Measure the area

L × W, each part

Length × width, in feet. Split curves and odd shapes into rectangles, then add them up.

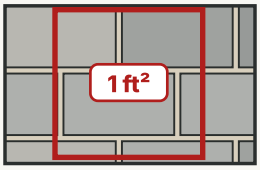

2 Pick stone and joint

+ ½" joint = 9½ × 5½
144 ÷ (9½ × 5½) = 2.76

Use the face that shows, plus the joint your installer plans. Decide the joint first.

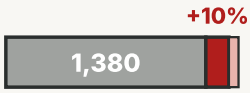

3 Multiply

2.76 per ft²

Area × stones per ft². 500 ft² of Regulation at ½" joints: 500 × 2.76 = 1,380 stones.

4 Add extra, round up

= 1,520

then round up

1,380 × 1.10 = 1,518. Order about 1,520, then fit it to pallets.

Stones per ft²

Laid flat · face size in inches

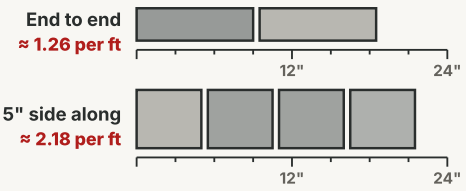

Belgian blocks (new)	Joint	Per ft²
Regulation 9 × 5	½"	2.76
Jumbo 10 × 7	½"	1.83
Landscape 8 × 4	½"	3.76
Cube 4 × 4	¼"	7.97
Paver 12 × 6	none	2.00

Reclaimed	Joint	Per ft²
Regulation 9 × 5	½"	2.76
Jumbo 11 × 7	¼"	1.77
Jumbo XL 12 × 8	¼"	1.42
Cube 5 / 6 / 7	¼"	5.22 / 3.69 / 2.74
Floor tile 11 × 7	¼"	1.77

How much extra?

- **10%** Simple, straight layouts
- **12–15%** Curves, odd shapes
- **12–15%+** Patterns, many cuts
- **12–15%** Reclaimed, spares

Borders: by the foot

Regulation, ½" joints. Jumbo end to end: about 1.14 per ft.

- Measure the whole run, curves included.
- Rule: 12 ÷ (face along the border + joint).

Three ways to buy

Belgian blocks · pallet coverage with ½" joints (Cube ¼", Paver laid tight)

A sample

One stone (Cubes: four) by priority mail, 1–3 days.

By the stone

Any number, from just one. Good for repairs and short runs.

By the pallet

	Jumbo	Regulation	Paver	Cube	Landscape
Stones	120	178	180	450	255
Covers	65 ft²	64 ft²	90 ft²	56 ft²	180 lf
